## FOR IMMEDIATE RELEASE

### Full Circle Restoration Announces Launch of New Website

*Introduces Valuable Mitigation and Insurance Claim Information Targeting Residential Customers*

[Duluth, GA August 21] – Full Circle Restoration and Construction Services, Inc. announced Friday, August 21, 2020 the launch of a new, modernized website targeting commercial, institutional, industrial, municipal/governmental, insurance, multifamily and single family residential customers and clients. The new website will provide valuable information about:

- The insurance claims process to those who may not be familiar with the basic process flow,
- How to read and better understand Xactimate insurance estimates,
- What to do and not do in the event of an emergency situation requiring mitigation, and
- What to consider when selecting a contractor.

The URL Address of the new website is the same as the original site: [www.fullcirclerestoration.com](http://www.fullcirclerestoration.com). “We don’t have a strong desire to drive a high volume of traffic to our website in an effort to market to our customers and clients, we do that in person. We use our website as a repository of valuable information for the benefit of our potential customers and to steer prospective customers to information they should consider when selecting a contractor. We think our customers and clients will find the new website easier to navigate and more valuable in finding valuable information says Orlando Ojeda, President Full Circle.
